-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 12 August 2005.
 2a) This action is FINAL. 2b) This action is non-final.

DETAILED ACTION

Claims 1-7 are presented for examination.

5 ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10 Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 use the phrase "capable of" which constitutes a use limitation and thus renders the claims indefinite as to what structure is embraced by the metes and bounds
15 of the claim language. See MPEP § 2111.04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

25 Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Record et al [Patent No. US 5,237,684].

As per claim 1, Record teaches the invention comprising:

- a method for transmitting digital messages through output terminals of a monitoring circuit integrated to a microprocessor [Col 4 lines 41-44], said messages being representative of determined events occurring on execution of instructions by the
- 5 microprocessor, comprising, after or before transmission of at least one specific message associated with a specific event, transmitting a correlation message comprising an identifier of said specific message and a counter of the number of instructions executed by the microprocessor between the instruction associated with the transmission of said message and the instruction associated with the transmission of a
- 10 selected previous message [Col 4 lines 45-55; and Col 5 lines 21-68].

As per claim 2, Record teaches the invention in which the selected previous

message is the immediately preceding specific message [Col 4 lines 35-55; and Col 5 lines 21-68].

15

As per claim 3, Record teaches the invention in which the correlation message comprises a correlation message identifier [Col 4 lines 33-55].

As per claim 4, Record teaches the invention in which the specific digital

20 message is representative of a data read or write instruction [Col 1 lines 29-34].

As per claim 5, Record teaches the invention in which the specific digital message is representative of an event independent from the execution of an instruction by the microprocessor [Col 4 lines 35-55].

5 **As per claim 6,** Record teaches the invention in which the transmitted digital messages are received by an analysis tool capable of associating based on correlation messages an instruction executed by the microprocessor with the each transmitted digital message [Col 5 lines 21-68].

10 **As per claim 7,** it is directed to a device including the means to implement the method of steps as set forth in claims 1-6. Therefore, it is rejected on the same basis as set forth hereinabove.

Conclusion

15 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Malcolm D. Cribbs whose telephone number is 571-272-5689. The examiner can normally be reached on M-F 8AM-430PM.
